

The image displays two covers of the Japanese manga magazine 'Shonen Magazine'.

The left cover is for the 'といてしよ。' (Toite Shio) series. It features a large illustration of a girl with white hair, blue eyes, and a black outfit, looking upwards with a surprised expression. The title 'といてしよ。' is written vertically in large, stylized blue characters. At the top, the 'Shonen Magazine' logo is visible, along with the text 'SHONEN MAGAZINE' and 'KODENSHO'. A barcode with the number 9784063637380 is located at the top right.

The right cover is for the 'といてしよ' (Toite Shio) series. It features a dynamic illustration of several anime characters in action poses, including a boy with spiky yellow hair and a girl with red hair. The title 'といてしよ' is written in orange characters. At the top right, the text 'SHONEN MAGAZINE COMICS' is visible. A barcode with the number 1929979004002 is located at the top left of the cover. Below the barcode, the text '雑誌 42265-38', 'ISBN4-06-363738-7', 'C9979 ¥400E (0)', '講談社', and '定価:本体400円(税別)' is printed.

The bottom of the image shows the '講談社' (Kodansha) publisher logo.

BLAH! Another chapter with some good stuff...

I have a bit of bad news to share though...

As of Chapter 38 (the next chapter), I will be out of all the chapters that I pre-claimed when I took this position. While that *isn't* *really* that bad, it means that I will have to do some classing, re-drawing, etc, which in turn will be slower releases. This isn't just due to this though, I know when I took this position that my life gets *VERY* hectic and timeous at times, that's why I got a head while I could. Now, life is back to ordinary and that makes me slow for the next I think. However, I *am* NOT stopping work, nor am I taking a break, I will continue to edit this manga as long as I can, so no worries-

what's ending so so busy? well, I'm a maid/guard, so I have a day job, and that keeps me busy and means that I'm getting ready to build a house, which is a long, involved and expensive project. so top it off,

I'm doing some work for a local play as a favor to a friend, and that's taking up more time I have left on the right and weekends for the next month or so, with my luck and hectic, scheduled both I'll have a hard time editing. -valkrie

Anyway, this chapter has tons of bits—both inside, now that, it's talk about something completely unrelated to this world. Flooring. Oh lordy everyone knows carpet, ceramic tile, wood (oh?), and the cheap linoleum (oof!) stuff— but it's also getting more common to see other materials now, such as cork and recycled concrete. Cork is quite an interesting option, but now I'm out of room.

*I'll note for those who have no class science,
here's an explanation of what's been going on.

It first started with the hell-bling Isaac Newton's discovery of gravity with the apple.

Then it went to Copernicus and his discovery that Earth revolved around the sun and not the other way around.

Then Reinhold tabulated Archimedes' and his discovery of buoyancy.

A better story will come from Wikipedia. http://en.wikipedia.org/wiki/ArchimedesPrinciple_Golden_Crown

Really, only William Fleming's right hand/leg for... Well, no matter whatsoever.

But here's a nice wiki for those who don't know. http://en.wikipedia.org/wiki/FlemingBITE_right_hand_nole

Ohay... On the next page, I would have about the Big Bang theory. Another wiki http://en.wikipedia.org/wiki/Big_bang_theory

Grand prices refers to an astronomical event. Wiki http://en.wikipedia.org/wiki/Grand_prices

And finally I'm quoting Shinya Tsukano with the word:

And then she quotes Sara Descartes' famous "Digita ergo sum".

And so that's the end of the to Erika's science class!

Oh btw, I learned all this junk a few years over in school... still interesting stuff,
even if you don't see how it applies to daily life.

Maybe I'm valuing this barely scratches the surface of a good deal of the conversations I have with friends...

oh, and Pizzas....

3. Note: Ringo is apple in Japanese.

Call #40: Ringo takes and sudden realizations all come suddenly

And I'll call
this theory

"Big Bang"!

Long ago...

There was
an unknown matter
that exploded,

and that created
the "universe"!

And the universe
even today
continues to expand!

Our Earth is
merely
a part of a result
of that explosion!

And Ralph, Lapha
and some Satou,
subdividing it
in their
"Upbeat-
Scales-
Square
Theory".....

Oh my God...
That's the
Big Bang theory
developed by
George
Gamow..

You're so stupid!
Why are you in the 3 class?
Even though I wouldn't
say anything since
I'm from the 4 class.

Amazing,
stupid!

And what will
happen when
the planets of
the solar system
line up?

I'll call this...
the grand cross!

Ralph...
Lapha...
Nadia...

I used to
be a scientist...

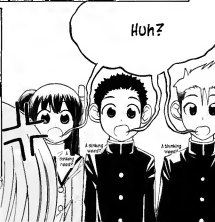

Oh...
that
theory...

I have
something
to say.

Science...
Lapha...
Where did you
